The diagram illustrates a mapping from four different source functions to a single target function. On the left, there are four white rectangular boxes, each containing a function name and a namespace. Arrows from each of these boxes point towards a single gray rectangular box on the right, which also contains a function name and a namespace. The arrows originate from the bottom-right corner of the first box, the bottom-left corner of the second box, the right side of the third box, and the top-right corner of the fourth box, all converging on the left side of the target box.
